# **OPENING CEREMONY**

## **NEW PLANT IN HAIGER, GERMANY**

On the 19th of July 2016 RAT- Spezialmaschinen GmbH celebrated its plant opening in Haiger with guests, customers, partners, suppliers and employees.

# OPENING CEREMONY

## NEW PLANT IN HAIGER, GERMANY

The strategic decision to relocate the plant of RAT – Spezialmaschinen GmbH from Frankfurt, Germany to Haiger, Germany was another important step to strengthen the competitive position for the whole group. By channeling both machinery and tooling competence in one place, we were able to create not only an European but worldwide address for high-quality engineering and tooling “made in Germany”.

*«Tutto quello che viene sviluppato e realizzato in questo sito, costituisce la realtà industriale di domani in tutti i nostri stabilimenti nel mondo»*

**Paolo Scudieri**

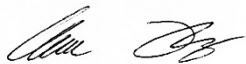

*«Everything that is developed and realized in this site, constitutes the industrial reality of tomorrow in all our plants worldwide»*

Paolo Scudieri

After several laborious month of relocation, in summer 2016 the new plant was finally on standby.

The opening ceremony took place in the production areas between machinery and tooling equipment. In presence of the owner Paolo Scudieri numerous guests, partners, customers and employees celebrated the opening together and listened to contributions from the three managing directors Uwe Herzog, Pietro Lardini and Alberto Buniato.

RAT – Spezialmaschinen GmbH is much obliged to all guests and especially to the employees, who all worked on bringing the company to the high level at which it is now.

Uwe Herzog, Managing Director
